DS-86 TOP MAILCENTER OPERATIONAL EFFICIENCY

Productivity, ease of use, and upgradability with the smallest footprint in its class

WE VALUE YOUR MAIL 

neopost

DS-86

TOP MAILCENTER OPERATIONAL EFFICIENCY

Don't miss business opportunities on account of your folder inserter. With the DS-86, Neopost facilitates productivity, flexibility and ease of use at the highest level. Opportunities are unlimited as it performs your daily administrative jobs and excels in direct marketing and other complex mailing applications. Moreover, with many upgrade capabilities, your future needs are also secured.

MAIL EFFICIENCY: FLEXIBILITY IS A MUST

You give so much attention to your mailpiece, so the DS-86 should handle the other applications required to run and develop your business. The DS-86 allows you to deliver the right message to your customers.

OPERATIONAL EFFICIENCY: FLEXFEED TECHNOLOGY

The DS-86 has 6 flexFeed technology feeders, allowing it to handle any document size or paper types (letter forms, inserts and leaflets, including glossy paper and coated material). The DS-86 is essential for performing direct marketing jobs.

FULL COLOR REVERSIBLE TOUCH SCREEN WITH LOAD'N GO AND JOB WIZARD

The DS-86 full-color interface, reversible touch screen and job wizard makes the entire system easy to use for anyone in the office without requiring a dedicated skilled operator. With the exclusive load'n Go technology, you simply load documents and envelopes, and then press start. Furthermore, you can adjust the position of the screen so that the user can view it more comfortably from any side of the machine.

EASY TO USE - JOB WIZARD & LOAD'N GO

HIGH PRODUCTIVITY WITH HIGH CAPACITY HOPPER & STACKER

MAXIMUM VERSATILITY WITH FLEXFEED & VERSAFEEDER

MODULARITY FOR BUDGET OPTIMIZATION

OPTIMIZED MAILING WITH SORTING OPTIONS

PRINTMACHINE SOFTWARE SOLUTIONS

PrintMachine software solution brings your document output management process and folder inserter system to the next level of automation and savings while maximizing the effectiveness of your business critical communications.

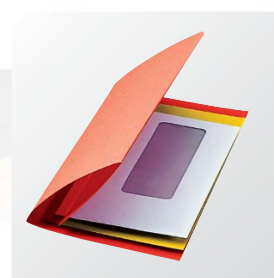

OPTICAL RECOGNITION (OMR & DUAL TRACK OMR)

With optical mark recognition, you can ensure that documents are securely inserted together in the proper envelope and automate the grouping and sorting process for sets of documents which have varying numbers of pages. Moreover, the DS-86 Dual Track OMR technology, unique in its class, guarantees optimal document integrity for all your critical mailing jobs.

VERSAFEEDER

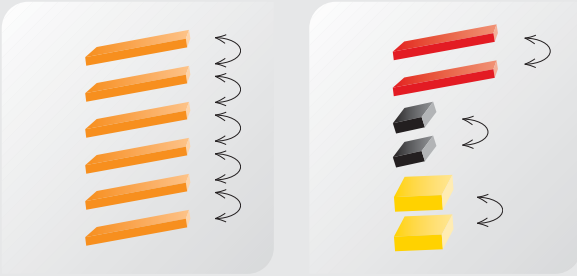

In order to provide increased flexibility, Neopost has developed a unique and specialized feeder to process thicker, stiffer material, such as booklets and brochures, without impacting its operational speed. Moreover, the versaFeeder can be loaded from the top to ensure seamless uninterrupted operation.

POWERFOLD FOLDING TECHNOLOGY

The DS-86 allows you to collate and fold up to 10 sheets single-fold or 8 pages tri-fold into an envelope. This exceptional feature allows you to make the most of your mailpiece and maximize an envelope's insert capacity, thereby reducing postage costs.

INPUT

FEEDER SWAP

Continuous operation is achieved by 'cascade' feeding. When one feeder empties, another one takes over. This reduces manual handling and enables refills without stopping the system.

PROFEEDER

The optional proFeeder (up to 2) provide larger capacity of documents or BREs. Load up to 2,400 sheets or 750 BREs in the optional twin proFeeder configuration for maximum productivity.

THROUGHPUT

DIVERT'N CONTINUE

To avoid futile stoppages and maximize productivity, the IntelliDeck diverts duplicate or faulty documents while the system is still running.

PRESENT ON DECK

The inserter deck is the alternative way to run divert'n Continue. It can also be used to check a test set.

OUTPUT

DOUBLE YOUR ENVELOPE CAPACITY

The Optional High Capacity Envelopes Hopper and High Capacity Conveyor Stacker (each with a capacity of 1,000 envelopes) enable you to remain one step ahead. The DS-86 has many optional devices allowing you to design your own custom system to meet your current and future needs.

EFFICIENT MAIL SORTING

The DS-86 automatically sorts mail into two exits, based on postal code, set thickness, OMR mark, postal rates, or any combination of the above. The unique High Capacity powerStacker allows the system to be unloaded in an easy, convenient manner.
